OUR *Story*

Piotr and Marcin Papliński were born in an artistic family, running a small company that produced statuettes, monuments and metal sculptures.

Great knowledge about brass properties, constant contact with the material and discovering a market niche led to the first project of a brass wall decoration (Icon).

Today, both brothers run a company together with their father, who infused them with passion not only for the material, but also for arts and craftsmanship.

PAP DECO was created as an answer to those who first and foremost value high-end aesthetics, uniqueness, timelessness, quality and attention to detail.

POLISH *Manufacture*

PAP DECO is a Polish family owned manufacturer, a pioneer in brass wall decorations and furniture handles handcrafted using traditional casting technology.

Over 28 years of experience in metallurgy, unique character of handmade products, the highest quality, high-end finishing and greatest attention to detail make PAP DECO the answer to the needs of the most demanding Clients.

Each brass handle and wall decor designed by PAP DECO is a result of pure passion for high-end accessories, experienced craftsmanship and beauty of the natural material.

Beauty you can experience each day.

OUR *Statement*

Our mission is to surround ourselves with beautiful objects bearing the hallmarks of history, passion and artisanship.

We draw inspiration from nature, architecture, geometry and a human body that subtly merge together with an artisanal character of brass, creating unique experiences that can be touched each day.

CASTING

Technology

PAP DECO is all about the process and precise work of a man's hands. It starts with an inspiration transferred to paper and sculpture that slowly begins its journey with one of the most decorative natural materials - brass.

Most of PAP DECO's products are handmade using traditional sand or wax casting technology.

The technology consists of pouring a liquid metal into a previously prepared form, which after solidifying and manual processing becomes PAP DECO.

CLEANING

Each PAP DECO element is covered with a colorless varnish or wax, protecting them from the influence of external factors.

Brass ages with time, becoming more noble each day. If necessary, its previous form can be restored using a special brass-cleansing milk (referred to polished brass).

COLOURINGS

of handles and wall decorations

Each brass handle and decorative wall piece is handcrafted for a custom order that can be finished in 12 different shades.

**pap
deco**

COLOURINGS

of handles and wall decorations

The base of making the handles and wall decorations is 100% natural brass, which can have a patina finish, can be polished or galvanized.

Thanks to the rich collection of models along with a wide finishing spectrum, PAP DECO elements can be utilized in any design style.

One unique way for finishing is also the ability to cover the brass elements with 24K gold.
