

[packs]
2020

From our collection, we have selected for you door handles and closet knobs that we offer assembled in pairs to cover either both sides of a door (front and back) or two closet doors (side by side).

A pair of handles or closet knobs is associated with two small decorative plates. We also offer a locking system that can be installed on the selected plates.

We propose a variety of hand-applied finishes.

You may consult our COLLECTION catalogue if you are looking for a particular configuration, such as one door handle or a nuanced finish or colour.

As you know, we also offer the possibility of working with you to imagine and create bespoke objects that are adapted to your project needs.

Agnès & Manuel

THUMB-TURN & RELEASE KNOBS ON PLAQUE OVALE X-SMALL AS EXAMPLE

These two parts can be put on every decorative backplates proposed in this catalog. It is important to note that the distance between the axis of the handle and that of the privacy knobs is 70mm on French latch.

This is an important point to check on your side.
We usually sell the latch if necessary.

This contraction is to be taken into account only on the long backplates which connect these two axes (example OVAL MEDIUM or PARISSETTE SMALL). It is not to take into account in case you want small plates separated from each other (example below with OVAL X-SMALL).
